

### Usability Testing

The CMS facility can be invaluable for assessing product designs in the setting of routine and crisis practice. Here, companies in the medical device- and pharmaceutical fields can perform product evaluation and other studies of user interfaces, acceptance, training or elements in a realistic, controlled clinical environment. Aspects of FDA product validation may also be accomplished in a highly effective manner using simulation techniques. Video-conferences can be arranged for remote viewing or broadcast to larger audiences.

Fee: \$7,500 - \$11,000/day

Discounts may apply to non-profits.

### Clinical Facility Photographic/Film Setting

The flexible, 1,300-square-foot clinical facility at CMS may be used as a film studio for education, marketing, or creative purposes. CMS has the space, equipment and expertise to outfit the environments of operating rooms, intensive care units, emergency departments, and other clinical facilities. CMS may be rented as a photographic or film setting for extended periods of time without concern for interfering with patient care.

Fee: \$2,500 - \$5,500/day
