

IMS/Europe

Medical Simulation Instructor Training: *"Simulation as a Teaching Tool"*

June 6 - 9, 2011
Conducted in English

14-17, 2011
*Conducted simultaneously
in Spanish & English*

The Center for Medical Simulation and Hospital Virtual Valdecilla are sponsoring an Institute for Medical Simulation Instructor and Debriefing Course taught by Harvard and HvV Faculty.

This IMS workshop is a 4-day intensive immersion in healthcare simulation specifically designed for those educators seeking to create high-quality healthcare simulation programs. It covers high level elements and concepts involved in using simulation as a teaching tool. Drawing on the disciplines of aviation, healthcare, psychology, experiential learning, and organizational behaviour, participants learn how to teach clinical, behavioral, and cognitive skills through simulation. Participants explore simulator based teaching methods applicable across the healthcare education spectrum, including undergraduate and graduate medical, nursing and allied health domains. Attendees join a growing community of Institute graduates who are positioned as leaders in the field. Daily formats vary and include simulation scenarios, lectures, small and large group discussions, case studies, and practical exercises with feedback.

Tuition for this course is 2.000 €

If you are interested in registering for this course or would like more information please email Ignacio del Moral, MD, PhD, Director of the Hospital Virtual Valdecilla at idelmoral@me.com

Founded in 1993, The Center for Medical Simulation (CMS) was one of the world's first healthcare simulation centers and continues to be a global leader in the field. At CMS the focus is on communication, collaboration, and crisis management in order to develop skills and teamwork behaviors that are best learned actively under realistic conditions. Since it first opened in 1993, CMS has run over two thousand courses and trained thousands of participants using its innovative and challenging scenarios. CMS' Institute for Medical Simulation evolved from research developed through a collaborative project between the Center for Medical Simulation and the Harvard-MIT Division of Health Sciences and Technology funded by a grant from the Josiah Macy, Jr. Foundation.
