

Healthcare Adventures

*Customized teambuilding workshops
and retreats in a realistic clinical setting*

“This workshop provided a unique stimulus and elicited very successful performance by the entire team throughout the year.”

Jim Heffernan, Mass. General Hospital

About the Center for Medical Simulation

The Center for Medical Simulation was founded in 1993 by Jeffrey B. Cooper, PhD, recipient of the 2003 JCAHO Lifetime Achievement Award in Patient Safety and other national patient safety honors. The Center has trained thousands of clinicians using hundreds of different clinical scenarios. Based in Cambridge, Massachusetts, we offer a variety of other programs relevant to many healthcare-related fields using simulation as a common tool including crisis management and teamwork training for clinicians and teams, ‘how-to’ courses for educators, simulation videoconferences for group meetings, and usability testing for device and pharmaceutical companies.

Would you like to improve your group’s decision-making, productivity and overall performance?

The Center for Medical Simulation’s Healthcare Adventures are one-day group workshops that combine customized team challenges with a novel teambuilding model. In this highly realistic clinical setting, you can identify group strengths and capitalize on them; or, identify barriers to effective teamwork and tackle them head on.

Applying the learnings collected from training the most dynamic and high-stakes teams of Harvard physicians over the last twelve years, we offer unrivalled performance-enhancing experiences for any leadership, management or administrative group involved in healthcare.

Unique workshops for diverse groups

- Improve the performance of your team and its individual players with goals as diverse as saving a life, agreeing on a departmental budget, increasing market share or taking on a new business, product or patient-care challenge.
- Participate in the intense pressure and emotion of being on the frontline of healthcare delivery. If you manage any aspect of healthcare, or would like to do so, this is the way to get hands-on experience as a member of a high performance team, without risk to patients.

Ideal for groups in all these areas of healthcare and medicine:

- Hospital and health plan administration
- Risk management and patient safety
- Healthcare education
- Philanthropic foundations
- Healthcare consulting
- Medical litigation
- Medical devices
- Drug delivery
