

THE CENTER FOR MEDICAL SIMULATION AND HOSPITAL VIRTUAL VALDECILLA Presents:

An Institute for Medical Simulation
Simulation Instructor Training Workshop
"Simulation as a teaching tool"

June 2012

This intensive **4-day** IMs/EUROPE Simulation Instructor Training and Debriefing Workshop, **taught by Harvard and Hospital virtual Valdecilla Faculty** is specifically **designed for those educators seeking to create high quality healthcare simulation programs.**

This Workshop immerses healthcare simulation leaders in a multi-method course wherein **participants learn how to teach clinical, behavioral and cognitive skills through simulation.**

Participants explore **simulator based teaching methods applicable across the healthcare education spectrum**, including undergraduate and graduated medical, nursing and allied health domains

The daily formats vary and include **simulation scenarios, lectures, small and large group discussions and practical exercises with feedback.** There will also be ample opportunities for **networking and sharing experiences.**

Topics covered within the workshop include:

- Building a challenging and safe learning environment
- Using effective debriefing techniques and avoiding ineffective ones
- Preparing, conducting and debriefing high-fidelity simulation scenarios

Dates:

- **18th -21st June.** Course conducted in English.
- **26th-29th June.** Conducted simultaneously in Spanish & English

Timetable: **8:30 am to 18:30 pm** (including breaks and lunchtime)

32 Teaching hours

A maximum of **20 participants**

Tuition fee: 2.200 euros

Includes

- Breakfast, lunch and afternoon tea.
- Coffee, tea, fruit and snacks all workshop long
- Learning material.
- Certificates
